Autumn Leaves.

What memories come, O Heart, To thee in the Autumn chill,

DURING THE TEMPORARY ABSENCE When the leaves that have done their part Are tossed at the cold wind's will? When the sun that beamed so bright Goeth down ere the day is past,

What shades dost thou see in the fading light? What sighs dost then hear in the blast?

Bright hopes have died like the leaves, But, unlike them, us more shall bloom; And the voice of the wind is like one who grieves Alone, in a world of gloom !

The shadows I see are those Who have passed from my side away, And I hear them speak at the short day's close. When the light is dall and gray,

Ahupuaa of Wailuku, And of in the midnight lone, When the world is wrapt in rest, The fond hopes I once called my own Rise living within my breast.

But soon, with a throb of pain,

I think of the leaves that fall, And liken their forms to the hopes so vain Which no Spring can recall.

A Rainy Day.

HAVING BEEN APPOINTED BY THE
Board of Health, Physician for the District of
Makawao, has taken his residence at the house in the
rear of Norton & Co.'s Store; and having established
Telephonic Communication with the various points of
business in the vicinity, will attend promptly to all calls,
either by telephone or by messages. He will also
visit regularly, unless prevented by professional
engagements, Pais, Spreckelsvile and Kahului en Tuesday and Thursday of each week, arriving at Spreckelsville by 12 o'clock, and remaining over each night in his
office at Kahului. It is a genuine rainy day--not showery or dull and drizzling-but there is the sound of abundance of rain.'

'This thirsty earth soaks up the rain, And drinks and gapes for drink again. is likely to have enough of it this time. for the windows of heaven are open, and at this rate, before night, the dry ways will be turned into brooks and the brooks into The following Merchandise just

this rainy day is a great disappointment--interferes with their plans and disturbs in-door work; we have a good excuse for not leaving the house, and the weather is an effectual protection against the intrusion from 24 to 26 pounds more, and a barrel of of vexatious visitors. We can settle down | American lager from 14 to 18 pounds more than to our writing or reading, or whatever else a barrel of water of the same size. Assuming we have to do, without the danger of intergated Roofing, Galvanized Ridging for ruption, and this gives a charm to our composition of a pint of ale, for the simple reawork. We are, of course, very sorry for son that he neither gives the size of the barrel those who are not allowed to stay within or the actual weight of either the water or the doors, let the weather be as it may-- for the beer. His proposition fairly stated is thismilkmen, the butchers, the bakers, the postmen and the railway employees who must face the storm, even if the rain must come known, it follows that if the barrel of ale weighs down in torrents; but, then, they are used from 24 to 26 pounds more than the barrel of to it, and have long since accepted this as one of the incidents of their vocation.

We would not care to live in a region where it seldom, if ever, rained. By scien-(Of which there is a number of worthless | tific irrigation good crops may be made to | ale does not consist substantially of the ingreimitations in the market). We are the Original to grow, but the artificial ditch is a poor Importers and SOLE AGENTS of these Cele- substitute for the rain. People want a little is to tell us what it does consist of and in what brated Bags, and the great demand for them | variety in the weather, as they do in everyfrom the Planters has induced some manufacture withing else. Who would wish to have bright mr. Cruzan's statement as absurd unless he is sunshine and the thermometer at seventy prepared to show wherein the absurdity consists.

This ought surely to be an easy took to a gentledegrees all the time ? We enjoy things by contrast, and the long, driving storm makes tific branches of his profession." By the way, the morning all the more glorious when | we are not accustomed in the United States to the clouds break and the sun comes forth in | speak of beer making as a "profession." To Mr. its might. The sweet and beautiful rain! (particulars will be given on arrival of the Just think of the good that comes of it.

In the first place, it washes the atmosphere of its foul and contaminating odors, like to "puff" his own wares. sweeps away into the rivers and through the rivers into the ocean those decaying substances which would breed pestilence on the land; replaces the stagnant waters with the sweet dews of heaven, and furnishes to man the only effectual material for his purification. We are told that the Arabs in the high. A sandbath would not satisfy us. | wich Islanders."

or the intermittent tornado pursuing its path with ruin.

Another function of the rain is that of a Not a blade of grass would grow, not a of New England, made up mostly of English flower bloom, not a grain of wheat ripen. leaves, all the materials that are indispensable to its growth may hover about it, but Palestine was once a land flowing with milk and honey--it is desolate and barren now,

One of the profound sayings that has come down to us from antiquity is this:--accept this without qualification, for we cant of some change in organization to which doubt whether it is in the power of man to the natural decrease is due. regulate the rain and the sunshine to any better advantage if the matter were put un-

of domestic labor, under certain circumstaces, becomes a dangerous weapon to handle. You desseminate in the air, and consequently introduce into your own interior, Parlor, Bedroom into your tissues and respiratory organs, strong men and the handsome women have all sorts of eggs, spores, epidemic germs and murderous vibiones which dust contains. One movement with a feather duster may strength has also fallen off perceptibly and inbe enough to poison both you and your what they were intellectually a generation ago. neighbors—to inoculate you all with typhus. Vigor and courage, originality and power in varioloid, or cholera—strange as it may literature, have been succeeded by finicism and damp cloth; wipe away the dust instead of and dread of all spontaneous expression. - N. F stirring it up. In short, wipe-never dust.

For a short time after the disruption an unkindly felling existed between the min- carrying and placing in exact position from isters of the Established Church and their 2640 to 3000 ties, bringing forward and deputation, "to dig our own graves?" the ties by four spikes to each tie. "Certainly, gentlemen," said Mr. Clark, It is said that a beer garden has been at you are most welcome; and the sooner established on the Mount of Olives in the

What the People Say.

We invite expressions of opinion from the public upon all subjects of general interest for insertion under this head of the ADVERTISEE. Such communications should be authenticated by the name of the writer as a gua-rantee of good faith, but not necessarily for publicaur object is to offer the fullest opportunity for a variety of popular discussion and inquiry.

Fo all inquirers we shall endeavor to furnish information of the most complete character on any subject in which they may be inferested.

The Scientific Brewer. Mr. Editor: -A person who signs himself Benjamin Lee, having occupied nearly a column in last Friday's P. C. Advertises in giving his views on beer and other matters, I hope you will allow me space to make a few comments

Mr. Lee says, "I am a brewer, and though not very old in years, profess to be so in experience, having given much study to the scientific branches of my prefession." The italies are mine. Further on this gentleman who thus assures us of his scientific attainments, uses this language: "English ales have, generally, a specific gravity of 24 pounds to 26 pounds to the barrel, and the lager beer as brewed in America 14 pounds to 18 pounds, i. e., a barrel being so much heavier than the same quantity of water; so where does the 14 ounces of water to the pint come in."

A gentleman who has given so " much study to the scientific branches of his profession, ought to know that specific gravity is not calculated or stated in pounds or in ounces, but in per centages. The specific gravity of any liquid (beer included) is the comparative weight of any given bulk thereof as compared with an equal bulk of some other liquid which is accepted as a standard; the standard generally being pure distilled water at a temperature of 60° When we say that the specific gravity of any liquid is 1050 for instance, we mean that its weight bulk for bulk, as compared with the standard liquid, (generally water, ) is as 1050 to thousand gallons. To speak of the specific grav-Suppose there are some persons to whom ity of a barrel of beer being so many pounds is simply nonsense. Possibly your correspondent understands all these matters, and only writes their appointments. But to others it comes in the manner he does, as a concession to the as a benediction -- it is the just the day for ignorance of us outsiders who have not given so

much study to the scientific branches, etc." If Mr. Lee's words mean anything they probably mean that a barrel of English ale weighs given two barrels of equal, but unknown size, containing one water and the other ale, the weights of both the water and the ale being unwater, then a pint of ale cannot consist of 14 ounces of water, a little extract of malt and one ounce of alcohol," more or less.. I fear your correspondent's studies in "science" have been at the expense of his mathematics. If a pint of dients or in the proportions as stated by Mr. Lee's glowing eulogy on teer a as beverage, I have nothing to say I understand that the gentleman contemplates starting a brewery in Honolulu, and it is but natural that he should

### New Englanders Dying Out.

It will not flatter the native New Englanders to find themselves compared with the Sandwich Islanders. But the comparison is made by a New England physician. The two peoples, according to him, are alike, however, only in desert, where water is very scarce and pre-cious, try to cleanse themselves by rubbing their bodies with sand. The standard of their tendency to die out. Besides the "strictly native New Englanders," says Dr. Allen, in the Popular Science Monthly, "there is only one other people or race where there has been such a other people or race where there has been such a cleanliness among that people is not very natural decrease in numbers—that is, the Sand-

Another thing which the rain does is to It is well known that since their Christianizaregulate the temperature. If the process fallen off rapidly in numbers. The decrease of evaporation and condensation were sus- within fifty years has been two-thirds. In 1830, pended the earth would soon become unin- when the first census was taken, the population habitable, and whatever was not killed by was 130,000. That was ten years after the the frost would be withered by the heat.

This would be a zone of ice and a zone of frost would become extinct.

American missionaries began their work. According to the last census the total was about 40,000, or less than one-third as many as fifty fire, and in both life would become extinct. 40,000, or less than one-third as many as hity In place of the gentle winds which now | carried into the Sandwich Islands diseases ingradually cool the equator, and bear away duced by licentiousness and intemperance, its superfluous heat to the artic, there would | which have caused a physical degeneracy in the be either dead stagnation in the atmosphere violated to such an extent that it threatens the extinction of the people," says Dr. Allen.

The decrease in numbers among the strictly native New Englanders, however, is attributed vivifier. Life would be impossible if there were neither rain, nor dew, nor moisture.

Not blade of green would grow not a blade of green would grow not a stock, multiplied rapidly. Their natural in-

every beast of the field lie down and die, and the inhabitants of man would be desolate.

Still another office of the rain is that of a fertilizer. Water is the medium by which all that goes to form the substance of living this source has taken place. Carefully kept records show that the average number of chiltens is the medium by which all that goes to form the substance of living things is brought into contact with them, generation. "They commenced with large famren to each family has decreased with every and assimilated by them. The roots of a liles, averaging eight or nine, but it is now tree may be embedded in the richest soil, doubtful whether the average will exceed three the warm sunlight may play upon its children to a family, scarce enough to keep the original stock good in numbers." And "this change has accurred in the same places, the sable to its growth may hover about it, but same people, having the same climate and unless there is moisture to open the pores plenty of food." The main cause, says Dr. Allen, is that "the

one iota to its bulk, and will soon only be- men are not so strong and vigorous as their grandfathers and ancestors, and the women have come a withered stick. The desert is a desert simply from want of water; let the rain come, and after a little while the grandfathers and ancestors, and the women have deteriorated physically in a surprising degree. A majority of them have a predominance of nerve tissue, with weak muscles and digestive wilderness will bloom with verdure. organs. The most marked change in this one hundred years, in organization, is this loss of balance or harmony in the organs; and especially in women it is far more striking. They have because the rain has in a great measure been diverging more and more from the normal standard upon which the law of propagation is based." Only about one-half of the New England women can properly nurse their offspring, and this incapacity for nursing is constantly in-When it rains, let it rain.' We do well to creasing. This Dr. Allen regards as very signifi-

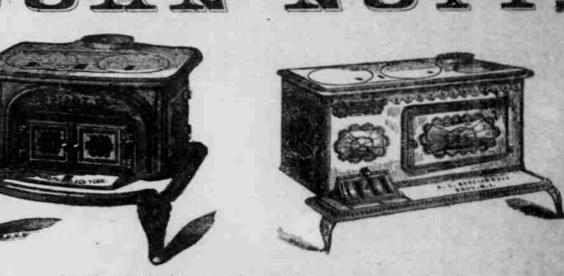

The facts on which Dr. Allen bases his conclusions are known to everybody who is familiar with the present New Englanders of the old stock. We mean those who are still to be found in the region inhabited by their ancestors-the New Englanders who have remained at home. Dust and Dusting -Do not dust, but Their families are small. They are not physiwipe! The duster, that peaceful emblem | cally as vigorous as their fathers. The women are not symmetrically developed, and their nervous organization is apt to be morbid. Of course, there are exceptions, but they generally We are in earnest. An eminent scientist declares it to be a fact. Do you know what you are doing when you brush away dust? The best of the New England stock has not re-

appear. Instead of a feather duster take a dillettantelsm, timidity, emasculation, imitation

protesting brethren. Several "free" parish- laying down, exactly the right distances ioners of Blackford, Pertshire, waited on apart, 362 rails (if of 60 pounds to the yard), Mr. Clark, the Established minister, and each 30 feet long andweighing 600 pounds, proffered the request that they might have or an aggregate of nearly 941 tons, or the services of a non-Erastian sexton. 211.200 pounds, and fastening the rails to Columbus Buggy Co. These Carriages are a sam-"Will you allow us, sir." said one of the each other by fish plates and bolts, and to ple lot consigned direct from the manufactory and
